Mesud Ali

AI full-stack developer · Addis Ababa, Ethiopia

Summary

Full-stack developer who turns ideas into reliable web applications, from interface and API to database and deployment, with AI integration such as chat assistants, semantic search and document Q&A. Self-taught and trained through the AI Powered Fullstack Application Development Program at Evangadi, with a Statistics background at Addis Ababa University that I use to check data and measure results. Disciplined and dependable: I break big problems into clear steps, test what I build and keep going until it works properly.

Skills

Area	Technologies
Frontend	Next.js, React, TypeScript, Tailwind CSS, HTML, CSS, JavaScript
Backend	Node.js, Express, REST APIs, Python, FastAPI
AI integration	LLM APIs, retrieval-augmented generation (RAG), semantic search, embeddings, prompt design, chat assistants, document Q&A
Data, payments and security	PostgreSQL (pgvector, PostGIS), MySQL, Supabase, Stripe, JWT authentication, rate limiting, input validation
Tools	Git and GitHub, Docker, Vercel, Railway

Projects

Askly: AI chat widget that answers from your own documents · Live demo · Code

- Designed and built an embeddable assistant that a business adds to its website with one script tag.

- Answers only from the business's own documents using semantic search (pgvector) and RAG with the Gemini API, cites its sources and replies in English and Amharic.
- Says "I don't know" instead of guessing and logs the question; an owner dashboard shows usage, visitor ratings and unanswered questions.
- Protects each widget with an allowed-domains list and strict CORS.
- Stack: Next.js, TypeScript, Express, PostgreSQL, pgvector, Gemini API, deployed on Vercel and Railway.

AmpShare: peer-to-peer marketplace for EV charging · Live demo · Code

- Live platform where homeowners and businesses list chargers and drivers find them on a map, book time slots and pay online.
- Worked across the stack in a team of four: location-based search, booking rules that prevent double bookings, role-based accounts, payments and real-time updates.
- Stack: React, TypeScript, Node.js, Express, PostgreSQL, PostGIS, Docker.

Experience

Web Application Developer · 2+ years

- Built full-stack web applications end to end, from frontend and API to database and deployment, including Askly and AmpShare.

Participant, INSA Summer Camp

- Took part in the INSA summer camp program.

Full Stack Development Intern, CodeAlpha · Virtual internship

- Hands-on full-stack web development tasks, building and testing features across frontend and backend.

Education and training

- **Addis Ababa University:** Statistics, second year (in progress). Coursework includes probability distributions, hypothesis testing, ANOVA, linear algebra and multivariable calculus.
- **Evangadi:** AI Powered Fullstack Application Development Program, completed with certificate (2026).

Languages

- English: fluent
- Amharic
